

MINIVAP 2

Steam generators with iron.

With 2 litres boiler with manual feed.

Product code: 1013

DESCRIZIONE:

Compact boiler with iron for semi-professional usage. Uses regular tap water (not softened) and requires little maintenance.

Professional

800 W steam electric iron, professional grade. The boiler provides approximately 2 hrs of non-stop operation.

Easy to use

Just open the cap, fill in the water, close the cap and turn on the appliance. When the green “steam ready” light turns on, the iron is ready to go. When water is going to finish a red “low water” light and a buzzer tell you that it is time to refill.

Extremely safe

The boiler is equipped with a double thermostat protection and safety valve. The iron is protected by a thermal fuse to prevent overheating. Stainless steel boiler and stainless heating elements provide lifelong operation in total safety.

Inexpensive operation

The boiler runs on regular tap water (not softened) Self-cleaning heating elements are not damaged by limescale and require little maintenance in time The whole appliance only requires 1500 W
